Education

VNR Vignana Jyothi Institute of Engineering and Technology

2022 – 2026

B.Tech in Computer Science and Engineering (CGPA: 8.66)

Hyderabad, Telangana

Internship Experience

Bluestock Fintech

Remote

Software Development Engineer Intern

Jan 2026 – Feb 2026

- Developed **Python-based REST APIs** for automated fundamental analysis of stock market companies.
- Built backend modules to process financial datasets and generate structured company insights for analysis dashboards.
- Implemented **API endpoints** for retrieving and processing stock-related financial metrics, improving data accessibility for frontend applications.
- Optimized API response handling and database queries, reducing backend response time and improving reliability.
- **Technologies:** Python, REST APIs, Git

Projects

Smart Placement Assistance Platform | *ReactJS, FastAPI, ChromaDB, spaCy, Ollama* [Link](#) 

2025

- Developed an AI-powered placement assistance platform featuring dashboards, company insights, and a chatbot for career guidance.
- Improved student engagement by **50%** and reduced information retrieval time by **40%**.
- Integrated **RAG-based architecture** using ChromaDB for intelligent retrieval of placement data.

Customer Churn Prediction | *Python, Scikit-learn, Pandas* [Link](#) 

2024

- Performed exploratory data analysis on **7000+ customer records** to identify churn patterns.
- Trained multiple ML models including Logistic Regression, SVM, Decision Tree, and KNN achieving **82% accuracy**.
- Visualized churn insights using Matplotlib and Seaborn to improve interpretability.

Python Data Science Project | *Python, BeautifulSoup, Pandas* [Link](#) 

2024

- Built a data analysis workflow involving web scraping, cleaning, and visualization of real-world datasets.
- Reduced manual analysis time by **35%** using automated data processing pipelines.
- Created interactive visualizations to communicate insights effectively.

Technical Skills

- **Languages:** Python, Java
- **Web Technologies:** HTML, CSS, JavaScript, ReactJS, Node.js, ExpressJS
- **Databases:** MySQL, MongoDB
- **Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, FastAPI, ChromaDB, spaCy

Conference Presentations

Smart Placement Assistance: A RAG Framework with Dynamic Visual Analytics for Career Guidance **2026**

- *ICCTAC 2026 – International Conference on Current Trends in Advanced Computing* | Virtual | **Accepted**
- Presented an AI-powered career guidance platform using **Retrieval-Augmented Generation (RAG)**, dynamic dashboards, and a chatbot; improved student engagement by **50%** and reduced information retrieval time by **40%**.

Virtual Reality-based Robotic Manipulation: Control Paradigms and Application Perspectives **2026**

- *ICTMIM 2026 – International Conference on Trends in Material Science and Inventive Materials* | Virtual | **Accepted**
- Presented research on **VR-driven robotic arm control** integrating computer vision and gesture recognition for real-time human-robot interaction; supported by Indian Patent No. 202541117650.

Patents & Research

Virtually Controlled Robotic Arm for Gesture-Driven Real-Time Operations | *Indian Patent – Published*

- **Application Number:** 202541117650
- Designed a VR-based robotic arm control system enabling gesture-driven real-time manipulation.
- Integrated computer vision and virtual reality technologies to enable intuitive human-robot interaction.
